PROFESSIONAL SUMMARY

I am Dheuvendra Patel a MCA graduate Student with 6 months of hands-on experience in web development, specializing in building modern and responsive web applications using Next.js and React.js. Experienced in developing multiple websites with a focus on clean UI, reusable components, and smooth user experiences. Passionate about learning new technologies and improving development skills while contributing effectively to real-world projects.

TECHNICAL SKILLS

Frontend: Next.js, React.js, JavaScript, TypeScript, Tailwind CSS, HTML5, CSS3

State Management: Zustand

APIs & Integration: REST API Integration, Google Gemini API, Chart.js

AI Tools & Deployment Tools : Antigravity, Claude, GLM 5.2, Cursor, Git, GitHub, Vercel, Postman

EXPERIENCE

Rego Digital Solution — Trainee Developer

Dec 2022 – Jun 2023

Paid Internship

- Built and styled UI features for assigned web application tasks, connecting components to backend REST APIs for data display and user interaction.
- Worked with JavaScript and web frameworks to implement features from given requirements, handling form validation and UI-side logic.
- Consumed and tested REST API responses to ensure data rendered correctly in the interface, handling loading and error states.
- Debugged frontend issues and verified UI behavior against API responses before feature completion.

PROJECTS

NutriFit — AI-Powered Nutrition & Fitness Platform

React.js, TypeScript, Tailwind CSS, Google Gemini API — REST API integration with a Node.js/Express backend

GitHub: github.com/null-quantum/nutrifit | Live: nutrifit-pi-beige.vercel.app

- Built responsive React interfaces for nutrition planning, BMI analysis, calorie tracking, fitness planning, and progress monitoring.
- Connected frontend components to REST APIs for data fetching, form handling, and real-time UI updates.
- Integrated Google Gemini-powered recommendations and a conversational nutrition assistant through backend API endpoints.
- Implemented client-side state management and responsive layouts across desktop and mobile views.

MoneyFlow — AI-Powered Personal Finance Platform

Next.js, TypeScript, Zustand, Tailwind CSS, Google Gemini API — REST API integration with a Next.js API backend

GitHub: github.com/null-quantum/moneyflow | Live: moneyflow-lemon.vercel.app

- Built the frontend for a personal finance application, including expense management, transaction history, and dashboards.
- Implemented category-based analytics and spending insights using Chart.js, driven by data from REST API calls.
- Managed application state with Zustand and built authenticated, user-specific views connected to protected API routes.
- Integrated Google Gemini-powered expense parsing and categorization through backend API endpoints; deployed on Vercel.

EDUCATION

Master of Computer Applications (MCA) — Sandip University, Nashik

2024 – 2026

Completed July 2026 | Average: 7.51 / 10

Bachelor of Computer Applications (BCA) — PSIT College of Higher Education, Kanpur

2019 – 2022

CGPA: 6.20 / 10
